Step 2: After downloading, users need to insert the USB drive or other USB devices into their computer, and then double-click the Rufus-2.5p.exe file that they had downloaded to get the following window.

Note: 1: It's recommended to copy all data on the USB drive since burning an iso image will erase everything on the drive!

2: Rufus will automatically identify USB device which has been connected the computer. If users can't find the desired USB drive, please try using another USB device or another USB port.

3: Users don't need to change the Partition scheme and target system type, File system, cluster size and New volume label.
